DESCRIPTION

ZEST GLOBAL OPPORTUNITIES is a global flexible balanced fund. The goal is to achieve excellent performance that is not linked to a pre-established market or a chosen benchmark. We invest in macro-trends (sectorial or geographical) looking for those innovative companies able to "create value" and / or in bonds that can generate an above average return, considering their rating and duration and comparing them with the market's Equity Risk Premium.

OUR STRATEGY: The fund combines a top-down approach, more linked to indices, with a bottom-up type, where asset management is not linked to a particular style (Value or Growth), and adapts itself to the different phases of the economic cycle. Stock-picking is oriented towards quality companies, with a high return on invested capital and growing revenues. Innovative companies, leaders in their sectors or in which leadership can be identified. After verification of the fundamentals, company visits and meetings with top management, the entry point is perfected using technical analysis.

Explanation

The map **Holding Based Style Map-Evolution**, shows the change of the style of your Portfolio over time (Time Period). The size of the dot indicates the distance from time T-0 where T-0 = today = bigger dot. Compare with the map **Holding Based Style Map-Last Month**, which shows the position at time T-0 (last month). Starting from the dot bigger, corresponding to the most recent portfolio (last month), you can observe the evolution of the style of the portfolio, back in time, until you reach 5 years ago.

Information regarding investment risks – PERFORMANCE DISCLAIMER

Past performance is not a guide to future performance. The performance data does not take into account of the commissions and costs incurred on the issue and redemption of units. The value of investments and any income is not guaranteed and can go down as well as up and may be affected by exchange rate fluctuations. This means that an investor may not get back the amount invested. Index returns assume reinvestment of dividends and capital gains and unlike fund returns do not reflect fees or expenses.

Investing in financial products involves risks, including in particular those associated to market fluctuations as well as the inherent risk of every product type. Investments may also be affected by changes to the rules and regulations governing exchange controls or taxation, including withholding tax, or by changes to economic and monetary policies. Future performance is subject to taxation which depends on the personal situation of each investor and which may change in the future. The possible investment in securities must be independently assessed on the basis of the Prospectus of the financial instrument and the suitability of the financial instrument with the specific characteristics of each investor.

Sustainability Factors – Information and Disclosure

For the purposes of Article 7(2) of SFDR, the Management Company confirms in relation to the Company and each Compartment that it does not consider the adverse impacts of investment decisions on sustainability factors at the present time. Sustainability factors are defined by SFDR as environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters. The main reasons for which the Management Company is currently not considering adverse impacts is the absence of clear regulatory guidance, sufficient data and data of a sufficient quality to allow the Management Company to define material metrics for disclosure.
