

ZEST DERIVATIVES ALLOCATION

30 April 2023

Fund Goal and Strategy

Zest Derivatives Allocation Fund aims to achieve an absolute return managing dynamically the total portfolio risk. In order to reach the performance objective the Management Team searches investment opportunities mainly in the bond and equity markets by assuming strategic tactical and relative value positions. Special emphasis is dedicated to options strategies to reduce market risks.

The flexible fund management is aiming at the reduction of the fund volatility and the achievement of a performance with the maximum decorrelation through a dynamic management of market exposure.

THE FUND : Zest Derivatives Allocation Fund is a flexible fund, set up according to UCITS V rules, with a top/down approach. It can invest in global equity markets, fixed income market as well as FX market with a strong emphasis on options strategies for risk management.

THE STRATEGY : the fund strategy is to search investment opportunities mainly in the bond and equity markets assuming strategic, tactical and relative value positions. The flexible fund management is aiming at the reduction of the fund volatility and the achievement of a performance with the maximum decorrelation through a dynamic management of market exposure.

RISK MANAGEMENT : The portfolio risk control function assures that every Fund asset allocation modification continues to maintain the VaR within the stated limit. If non-linear instruments are utilized (options etc.), the MVaR (modified VaR) is applied, in order to account for the non-normality of returns distribution, to further improve the Fund risk/return trade off.

MAIN RISKS: DERIVATIVES RISK Certain derivatives could increase Sub-Fund volatility or expose the Sub Fund to losses greater than the cost of the derivative. **MANAGEMENT RISK:** Portfolio management techniques that have worked well in normal market conditions could prove ineffective or detrimental during unusual conditions. **LIQUIDITY RISK:** Certain securities could become hard to value, or to sell at a desired time and price.

PERFORMANCE DISCLAIMER : The performance data does not take into account of the commissions and costs incurred on the issue and redemption of units. The value of investments and any income is not guaranteed and can go down as well as up and may be affected by exchange rate fluctuations. This means that an investor may not get back the amount invested.

*VaR (Value at Risk)

VaR is a statistical measure derived from the volatility of the time series of returns of various asset classes. **Monthly VaR 99% = 5** means that the fund can only be invested in instruments with volatility and correlation such as at any time it cannot be expected statistically and under normal market conditions to underperform the target of more than 5% in the following month with a 99% probability.

Asset allocation and fx exposure are relative to the date of publishing the fact sheet and they are only spot information. Portfolio VaR is computed on the basis of the above allocation together with the statistical features of the selected investment tools.

This is a marketing communication. Please refer to the prospectus and information document of the fund before making any final investment decisions. You will find the Prospectus and the information document on the dedicated website (www.zest-funds.com) in the relevant sections. You will find the KIIDs translated in all the languages where the SICAV and each sub-fund is registered and distributed.

No liability

In no circumstance whatsoever - including negligence - may the Fund, Zest SA, its directors or any employee be held liable for loss or damage of whatsoever type, whether direct or consequential, deriving from the use of this document.

Information regarding investment risks

Past performance is not a guide to future performance. The performance data does not take into account of the commissions and costs incurred on the issue and redemption of units. The value of investments and any income is not guaranteed and can go down as well as up and may be affected by exchange rate fluctuations. This means that an investor may not get back the amount invested. Index returns assume reinvestment of dividends and capital gains and unlike fund returns do not reflect fees or expenses.

Investing in financial products involves risks, including in particular those associated to market fluctuations as well as the inherent risk of every product type. Investments may also be affected by changes to the rules and regulations governing exchange controls or taxation, including withholding tax, or by changes to economic and monetary policies. Future performance is subject to taxation which depends on the personal situation of each investor and which may change in the future. The possible investment in securities must be independently assessed on the basis of the Prospectus of the financial instrument and the suitability of the financial instrument with the specific characteristics of each investor.

Sustainability Factors – Information and Disclosure

For the purposes of Article 7(2) of SFDR, the Management Company confirms in relation to the Company and each Compartment that it does not consider the adverse impacts of investment decisions on sustainability factors at the present time. Sustainability factors are defined by SFDR as environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters. The main reasons for which the Management Company is currently not considering adverse impacts is the absence of clear regulatory guidance, sufficient data and data of a sufficient quality to allow the Management Company to define material metrics for disclosure.
